

# ROTAX®

BUILT FOR FUTURE KARTING CHAMPS.

## THE NEW ROTAX E10

Many great motorsport champions started out racing karts. We believe electric racing classes have a great future. And that learning how to drive e-karts prepares kids for the future career. The new Rotax E10 is perfect for kids (and their parents). No tinkering. Minimum wear and tear. It can run on one or two batteries. This way, the E10 can „grow“ with the kids, or racers of different ages can use the same kart.

### POWER OUTPUT

# 14 kW

7 kW single battery |  
14 kW dual battery

### BOOST FUNCTION

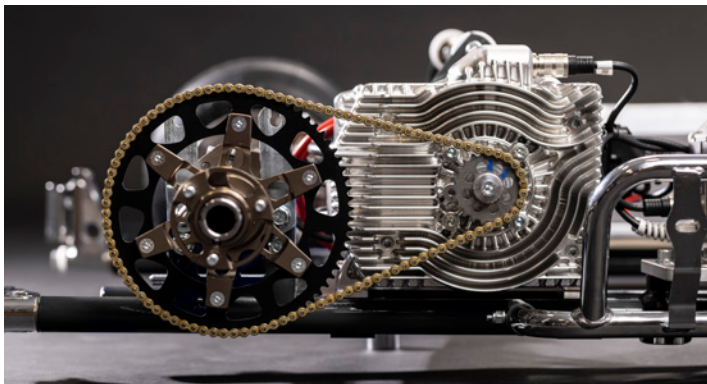

# +20%

more power for 5 sec.  
every 45 sec.

### DRIVE TIME

# 20 min

depending on race track

PROFESSIONAL		RECREATIONAL
E10 Bambini aged 6-9	E10 Mini aged 9-12	Sprint / Slalom use aged 6-99

### MAXIMUM PERFORMANCE

80 km/h single battery | 100 km/h dual battery

### PERFORMANCE

constant performance output down to 20%  
status of charge (SOC)

### KART WEIGHT

Total weight with a 950mm chassis:  
66 kg single battery | 76 kg dual battery

### MOTOR

Motor with inverter, air cooled by natural  
airstream and internal fan (patent pending)

### BATTERY

air cooled, optional: battery hood with  
electric fan (during charging process)

### TRANSMISSION

standard chain type 219

### CONTROL UNIT

Control panel with integrated MCU  
(motor control unit), with led indicators  
for battery status (SOC) and boost status

### REVERSE FUNCTION

available, operated by the driver
